The screenshot displays a web browser with two main windows. The left window shows the Testleaf application interface, which includes a navigation menu with options like Home, Leads, Contacts, Accounts, Cases, Activities, Orders, and Openings. The main content area is titled 'My Leads' and contains a table of lead data. The right window shows the 'AI Browser Extension for Code Generation' interface, which includes a 'Code Generator' section with a 'Page Class' tab selected. This section displays a Java code snippet for a 'FindLeadsPage' class.

AI Browser Extension for Code Generation:

```
package com.testleaf.pages;

import org.openqa.selenium.WebElement;
import org.openqa.selenium.support.FindBy;
import org.openqa.selenium.support.PageFactory;

/**
 * Page Object representing the Find Leads page.
 */
public class FindLeadsPage {

    /**
     * Initializes the FindLeadsPage with the given WebDriver.
     */
    public FindLeadsPage() {
        PageFactory.initElements(driver, this);
    }

    @FindBy(id = "ext-gen246")
    private WebElement leadIdField;

    @FindBy(id = "ext-gen248")
    private WebElement firstNameField;

    @FindBy(id = "ext-gen250")
    private WebElement lastNameField;

    @FindBy(id = "ext-gen252")
```

Code:

```
package com.testleaf.pages;

import org.openqa.selenium.WebElement;
import org.openqa.selenium.support.FindBy;
import org.openqa.selenium.support.PageFactory;

/**
 * Page Object representing the Find Leads page.
 */
public class FindLeadsPage {

    /**
     * Initializes the FindLeadsPage with the given WebDriver.
     */
    public FindLeadsPage() {
        PageFactory.initElements(driver, this);
    }

    @FindBy(id = "ext-gen246")
    private WebElement leadIdField;

    @FindBy(id = "ext-gen248")
    private WebElement firstNameField;

    @FindBy(id = "ext-gen250")
    private WebElement lastNameField;

    @FindBy(id = "ext-gen252")
```

```
private WebElement companyNameField;

@FindBy(id = "ext-gen334")
private WebElement findLeadsButton;

/**
 * Enters the Lead ID in the Lead ID field.
 *
 * @param leadId the Lead ID to enter
 * @return the current FindLeadsPage instance
 */
public FindLeadsPage enterLeadId(String leadId) {
    clearAndType(leadIdField, leadId);
    return this;
}

/**
 * Enters the First Name in the First Name field.
 *
 * @param firstName the First Name to enter
 * @return the current FindLeadsPage instance
 */
public FindLeadsPage enterFirstName(String firstName) {
    clearAndType(firstNameField, firstName);
    return this;
}

/**
 * Enters the Last Name in the Last Name field.
 *
 * @param lastName the Last Name to enter
 * @return the current FindLeadsPage instance
 */
public FindLeadsPage enterLastName(String lastName) {
    clearAndType(lastNameField, lastName);
    return this;
}

/**
 * Enters the Company Name in the Company Name field.
 *
 * @param companyName the Company Name to enter
 * @return the current FindLeadsPage instance
 */
public FindLeadsPage enterCompanyName(String companyName) {
    clearAndType(companyNameField, companyName);
    return this;
}

/**
 * Clicks the Find Leads button.
 *
 * @return the current FindLeadsPage instance
 */
```

```

    */
    public FindLeadsPage clickFindLeadsButton() {
        click(findLeadsButton);
        return this;
    }

    /**
     * Clears the given WebElement and types the specified text.
     *
     * @param element the WebElement to clear and type
     * @param text the text to type
     */
    private void clearAndType(WebElement element, String text) {
        element.clear();
        element.sendKeys(text);
    }

    /**
     * Clicks the specified WebElement.
     *
     * @param element the WebElement to click
     */
    private void click(WebElement element) {
        element.click();
    }
}

```

The screenshot shows the Testleaf application interface. On the left, there are navigation links for Home, Leads, Contacts, Accounts, Cases, Activities, Orders, and open taps. The main content area is titled "Find Leads" and contains a "Find by" section with input fields for Name and ID, Phone, Email, and Advanced. Below this is a "Lead List" table with columns: Lead ID, First name, Last name, Company Name, City, State/Province, Phone Number, and E-Mail Address. The table contains 15 rows of data. On the right, an "AI Browser Extension for Code Generation" overlay is visible, showing a "Code Generator" tab with a "Feature File" and "Page Class" section. The "Page Class" section contains the following code:

```

/**
 * Clicks the Find Leads button
 * @return the current FindLeadsPage instance
 */
public FindLeadsPage clickFindLeadsButton() {
    click(findLeadsButton);
    return this;
}

/**
 * Clears the input field and types the given text
 * @param element the WebElement to clear and type
 * @param text the text to type
 */
private void clearAndType(WebElement element, String text) {
    element.clear();
    element.sendKeys(text);
}

/**
 * Clicks the given WebElement
 * @param element the WebElement to click
 */
private void click(WebElement element) {
    element.click();
}

```

```

package com.testleaf.pages;

import org.openqa.selenium.WebElement;
import org.openqa.selenium.support.FindBy;

```

```

import org.openqa.selenium.support.PageFactory;

/**
 * Page Object for Find Leads Page
 */
public class FindLeadsPage {

    public FindLeadsPage() {
        PageFactory.initElements(driver, this);
    }

    @FindBy(id = "ext-gen246")
    private WebElement leadIDField;

    @FindBy(id = "ext-gen248")
    private WebElement firstNameField;

    @FindBy(id = "ext-gen250")
    private WebElement lastNameField;

    @FindBy(id = "ext-gen252")
    private WebElement companyNameField;

    @FindBy(xpath = "//button[text()='Find Leads']")
    private WebElement findLeadsButton;
